Hybrid • On-site • Remote • B2B

SUMMARY

Senior Angular Frontend Engineer with over 10 years of experience in web development and more than 4.5 years delivering enterprise Angular solutions in HealthTech, scientific software and R&D automation. Expert in TypeScript, RxJS, NgRx, Signals, API integration and Agile methodologies. Possesses commercial full-stack experience in PHP, MySQL and Ext JS, complemented by practical knowledge of React and Node.js. Fully capable of working independently in high-load corporate environments. Currently seeking to join a high-performing team of strong industry professionals where I can leverage my enterprise-grade frontend expertise and continue my professional growth. Available for an immediate start.

CORE SKILLS

- Frontend Frameworks: Angular 12, Angular 13, Angular 14, Angular 15, Angular 16, Angular 17, Angular 18, Angular 19, **Angular 20**, **Angular 21**, **TypeScript**, **RxJS**, **NgRx**, **Signals**, JavaScript, ExtJS, React
- UI and Styling: **Angular Material**, **AG Grid**, CDK, Canvas API, Tailwind CSS, LESS, HTML5, CSS3, SCSS
- Testing and QA: Unit Testing, **Jest**, **Jasmine/Karma**, **Vitest**
- Tools and Architecture: **Git**, **Jira**, GitHub, Docker, VS Code, **Cursor Agent**, WebStorm, npm, pnpm
- Backend Experience: **REST API**, CI/CD Pipelines, PHP, Zend Framework 2, Node.js, MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

ACD/Labs (Revvity Signals) Minsk, Belarus
Scientific R&D software (analytical chemistry / lab informatics) for pharma and industrial customers
Frontend Developer (Angular) December 2021 - April 2026

Project: **SpectrusProcessor** (Desktop-to-Web Greenfield Migration) December 2021 - April 2026
Web platform for analytical chemistry, 1D/2D NMR data processing and R&D automation.

- Improved rendering performance and reduced component re-render times by 35 percent through migration to Angular 21+ utilizing Angular Signals, Signal Stores and Signal Forms.
- Co-developed an interactive custom Canvas Web Component featuring advanced real-time zoom, pan and responsive data selection tools for spectrum rendering.
- Designed and developed the frontend architecture and feature delivery for a flexible drag-and-drop Report Builder module.
- Stabilized data flows and eliminated 95 percent of data synchronization errors through robust REST API integration and the refactoring of the core Overlay module, combining Angular Signals, NgRx, and high-performance Protobuf data communication to ensure smoother end-to-end user journeys aligned with interactive Figma and Axure prototypes.
- Cut the product operational and development budget by nearly 40 percent by engineering the desktop-to-web migration into a unified web platform.
- Decreased production issues and data synchronization errors by 30 percent across the Angular codebase through legacy module refactoring, client-side UI optimization and expanding unit test coverage using Jest, Jasmine/Karma, and Vitest.
- Accelerated feature delivery speed by 20 percent within an Agile/Scrum environment by actively participating in technical code reviews (PRs), optimizing Git workflows, utilizing AI-assisted development via Cursor Agent and driving close cross-functional collaboration with product management, UI/UX, backend and AQA/QA teams.

Project: **SpectrusConduit** (Low-Code / No-Code Enterprise Platform) July 2024 - April 2026
Enterprise software designed to automate laboratory workflows and digitize scientific data.

- Engineered and delivered responsive card-based UIs and dynamic, data-heavy enterprise grids leveraging AG Grid and Angular CDK.
- Executed a comprehensive frontend modernization and full UI refresh, achieving 100 percent compliance with a new, unified design system.
- Wired high-performance layout components to complex backend server REST APIs, focusing on visual consistency, theme-specific styling and strict custom typography standards.
- Developed over 15 new user interfaces and executed a full UI refresh under Agile methodology, ensuring 100 percent design system consistency.

ExonIT LLC Minsk, Belarus
Provider of GIS / geospatial software and web solutions for government and enterprise customers in Belarus
Full-Stack Developer (ExtJS + PHP) September 2017 - November 2021

- Enhanced operational workflow efficiency for a high-load internal Enterprise system with 5000+ daily active users by reducing user task completion time by 25 percent through architecting 30+ dynamic UI components using JavaScript and Ext JS.
- Improved system performance and database availability by 40 percent by rewriting complex PostgreSQL queries and building scalable PHP background services using Zend Framework 2.
- Drove consistent software delivery lifecycles under Agile methodologies by delivering 87 percent of major releases strictly on schedule through enforcing clean Git workflows and commit policies.

ODO Farmin Minsk, Belarus
Pharmaceutical wholesale & retail distributor in Belarus
Full-Stack Developer (Vanilla JS + PHP) June 2016 - August 2017

- Streamlined system maintenance and bug-tracking workflows by successfully closing 100+ Jira tickets through meticulous refactoring and debugging in a high-load PHP and JavaScript environment.
- Optimized client-side performance and user retention by accelerating page load speed by 25 percent through modernizing legacy styles and refactoring core JavaScript modules.
- Reduced manual data processing time by 5 hours per week by implementing robust API integrations that automated data exchange with external pharmaceutical services.

UE ValConsultBy Minsk, Belarus
Provider of custom software development and enterprise IT consulting services
Backend Developer (PHP) December 2015 - March 2016

- Developed new software features and closed critical bug tickets by refactoring backend logic using PHP and Zend Framework.
- Optimized user interface responsiveness by executing front-end modernizations on website layouts using JavaScript.

PREVIOUS ENGINEERING EXPERIENCE (2007 - 2015)

- Systems and Telecommunications Engineer: RUE National Centre of Electronic Services, Llc. Belhard Development (BelToll project), RUE Minskenergo, AGAT-CONTROL SYSTEMS.
- Gained 8 years of foundational engineering experience, focusing on infrastructure stability, Public Key Infrastructure (PKI), Cisco networking and technical documentation compliance.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR) Minsk, Belarus
Bachelor's degree in Telecommunications, Telecommunication Networks (InfoSec) September 2003 - June 2008

COMPLETED COURSES AND TRAINING

- React and Angular web application development - Educational Centre of Hi-Tech Park Belarus (May 2021 - August 2021)
- Angular (Full App) with Angular Material, Angularfire & NgRx - Udemy Certification (January 2021)
- JavaScript web-applications development - Educational Centre of Hi-Tech Park Belarus (March 2019 - June 2019)
- Front-end Developer, PHP Developer, PHP Development Practice - Educational Centre of Hi-Tech Park Belarus (August 2014 - June 2015)
