

VOLHA DZIKUN

Senior Angular / Frontend Developer

Phone: +375 29 128 6586

E-mail: dikun.volha@gmail.com

LinkedIn: linkedin.com/in/volha-dzikun-097194a1

GitHub: github.com/dicun

Location: Minsk, Belarus

Work Format: Hybrid • On-site • Remote • B2B

Relocation: Open to relocation within the EU/EEA

PROFILE SUMMARY

Senior Angular Frontend Engineer with over 10 years of experience in web development and more than 4.5 years delivering enterprise Angular solutions in HealthTech, scientific software and R&D automation. Expert in TypeScript, RxJS, NgRx, Signals, API integration and Agile methodologies. Possesses commercial full-stack experience in PHP, MySQL and Ext JS, complemented by practical knowledge of React and Node.js. Fully capable of working independently in high-load corporate environments. Currently seeking to join a high-performing team of strong industry professionals where I can leverage my enterprise-grade frontend expertise and continue my professional growth. Available for an immediate start.

CORE SKILLS

Frontend Frameworks:

Angular 12-21, TypeScript, RxJS, NgRx, Signals, JavaScript, ExtJS, React (Academic)

UI and Styling:

Angular Material, AG Grid, CDK, Canvas API, Tailwind CSS, LESS, HTML5, CSS3, SCSS

Testing and QA:

Unit Testing, Jest, Jasmine/Karma, Vitest

Tools & Architecture:

Git, Jira, GitHub, Docker, VS Code, Cursor Agent, WebStorm, npm, pnpm

Backend Experience:

REST API, Keycloak (Auth), CI/CD Pipelines, PHP, Zend Framework 2, Node.js (Familiar), MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

ACD/Labs (Revvity Signals) — Dec 2021 - Apr 2026

Frontend Developer (Angular) — *Minsk, Belarus*

Scientific R&D software (analytical chemistry / lab informatics) for pharma and industrial customers

Project: SpectrusProcessor (Desktop-to-Web Greenfield Migration)
(December 2021 - April 2026)

Web platform for analytical chemistry, 1D/2D NMR data processing and R&D automation.

- Improved rendering performance and reduced component re-render times significantly through incremental updates following each official release up to Angular 21+, successfully migrating to Angular Signals, Signal Stores and Signal Forms.
- Co-developed an interactive custom Canvas Web Component featuring advanced real-time zoom, pan and responsive data selection tools for spectrum rendering.
- Designed and developed the frontend architecture and feature delivery for a flexible drag-and-drop Report Builder module.
- Stabilized data flows and ensured seamless data synchronization through collaborative API contract designs, robust REST API integration and the refactoring of the core Overlay module, combining Angular Signals and NgRx to deliver fluid end-to-end user journeys aligned with English technical specs and interactive Axure prototypes.
- Substantially drove down product operational and development costs by engineering the desktop-to-web migration into a unified web platform.
- Drastically reduced production issues across the Angular codebase by executing legacy module refactoring, optimizing client-side UI performance and expanding unit test coverage using Jest, Jasmine/Karma and Vitest.
- Optimized feature delivery cycles within a global English-speaking Agile/Scrum environment by participating in technical code reviews, mentoring, optimizing Git workflows and driving close collaboration within a 15-person cross-functional team (PMs, Devs, UI/UX, QA/AQAs).
- Expedited development timelines and unit test creation by 20% by integrating AI-assisted workflows via Cursor Agent.

EDUCATION

BSUIR

Bachelor's degree in Telecommunications, Telecommunication Networks (InfoSec)

2003 - 2008

COMPLETED COURSES

• React and Angular web application development - Educational Centre of Hi-Tech Park Belarus (2021)

• Angular (Full App) with Angular Material, Angularfire & NgRx - Udemy Certification (2021)

• JavaScript web-applications development - Educational Centre of Hi-Tech Park Belarus (2019)

• Front-end Developer, PHP Developer - Educational Centre of Hi-Tech Park Belarus (2015)

PREVIOUS ENGINEERING EXPERIENCE (2007 - 2015)

Systems and Telecommunications Engineer: RUE National Centre of Electronic Services, Llc. Belhard Development (BelToll project), RUE Minskenergo, AGAT-CONTROL SYSTEMS.

Gained 8 years of foundational engineering experience, focusing on infrastructure stability, Public Key Infrastructure (PKI), Cisco networking and technical documentation compliance.

LANGUAGES

Russian: Native

English: B2 (Professional Working Proficiency)

Project: SpectrusConduit (Low-Code / No-Code Enterprise Platform)
(July 2024 - April 2026)

Enterprise software designed to automate laboratory workflows and digitize scientific data.

- Engineered and delivered responsive card-based UIs and dynamic, data-heavy enterprise grids leveraging AG Grid and Angular CDK.
- Executed a comprehensive frontend modernization and full UI refresh, achieving 100% compliance with a new, unified design system to enhance visual consistency across platforms.
- Wired high-performance layout components to complex backend server REST APIs, focusing on visual consistency, theme-specific styling and strict custom typography standards.
- Delivered a diverse range of modular user interfaces under Agile methodology, collaborating within a 9-person team (Devs, PM, QA/AQAs) to accelerate feature deployment and ensure seamless alignment with unified design system standards using Jira strictly in English.

ExonIT LLC — Sep 2017 - Nov 2021

Full-Stack Developer (ExtJS + PHP) — *Minsk, Belarus*

Provider of GIS / geospatial software and web solutions for government and enterprise customers in Belarus

Project: Track Distance Passport (GIS)

- Enhanced workflow efficiency for a high-load Enterprise system, minimizing task completion times within an 8-person cross-functional team (Devs, BAs, QAs) by architecting a highly scalable Ext JS/JavaScript dynamic component library.
- Significantly optimized system throughput and ensured high database availability by rewriting complex PostgreSQL queries and engineering scalable PHP background services using Zend Framework 2.
- Drove seamless software delivery lifecycles by consistently executing major releases strictly on schedule through enforcing clean Git workflows and commit policies.

ODO Farmin — Jun 2016 - Aug 2017

Full-Stack Developer (Vanilla JS + PHP) — *Minsk, Belarus*

Pharmaceutical wholesale & retail distributor in Belarus

Project: Corporate Portal & Analytics Reporting System

- Independently optimized system performance and stability as the sole engineer responsible for the entire application lifecycle, streamlining bug-tracking workflows, modernizing legacy modules and executing rigorous debugging of critical incidents in a high-load PHP/JavaScript environment.
- Significantly minimized manual data processing and operational overhead by implementing robust API integrations that automated seamless data exchange with external pharmaceutical services.

UE ValConsultBy — Dec 2015 - Mar 2016

Backend Developer (PHP) — *Minsk, Belarus*

Provider of custom software development and enterprise IT consulting services

- Developed features and resolved critical bugs within a 5-person team (Devs, PM, Layout Designer) by refactoring PHP/Zend Framework logic.
- Optimized user interface responsiveness by executing front-end modernizations on website layouts using JavaScript.
