

Volha Dzikun

Senior Angular / Frontend Developer

Tel.: +375(29)1286586 | E-mail: dikun.volha@gmail.com | [LinkedIn](#) | [GitHub](#)

Minsk, Belarus | Open to relocation within the EU/EEA

Hybrid | On-site | Remote | Freelance (B2B)

SUMMARY

Senior Angular / Frontend Engineer with 10+ years in web development and 4.5+ years delivering Angular solutions in HealthTech / scientific software for analytical and spectroscopic data processing, laboratory workflows and R&D automation actively looking for a new challenging role (available immediately). Experienced in TypeScript, RxJS, NgRx, API integration, Git, testing and cross-functional delivery across telecom, security, laboratory and industrial software. Commercial full stack experience in PHP and Ext JS (Vanilla JS), complemented by practical knowledge of React and Node.js.

SKILLS

- Front-End Frameworks: **Angular** v.12 – 21, **TypeScript**, **RxJS**, **NgRx**, **Signals**, JavaScript, ExtJS, React
- UI/Styling: **Angular Material**, **AG Grid**, CDK, Canvas API, Tailwind CSS, LESS, HTML5, CSS3, SCSS
- Testing: **Jest**, **Jasmine**, **Vitest**
- Tooling: **Git**, **Jira**, GitHub, VS Code, Cursor (Cursor Agent), WebStorm, npm, pnpm
- Additional Backend Experience: **REST API**, PHP, Zend Framework 2, Node.js, MySQL, PostgreSQL

EXPERIENCE

ACD/Labs (Revvity Signals)

Minsk, Belarus

Scientific R&D software (analytical chemistry / lab informatics) for pharma and industrial customers

Frontend Developer (Angular)

December 2021 – April 2026

Executed frontend migration of SpectrusProcessor from desktop to web using Angular 12–21, TypeScript, RxJS and NgRx (Store, Effects) while modernizing architecture and delivery over 4.5 years.

- Improved rendering performance with Angular Signals, Signal Stores and Signal Forms, reducing component re-render times by 35% and speeding up hotfix and feature delivery.
- Enhanced user experience (UX) by architecting a custom Canvas Web Component for interactive scientific graphics, incorporating advanced zoom, pan and responsive selection tools.
- Cut the product's operational and development budget by nearly 40% through migration to a unified web platform, eliminating desktop installation overhead and reducing deployment personnel costs.
- Reduced production issues by 30% through bug fixes, legacy refactoring, unit testing and UI optimization across the Angular codebase.
- Stabilized data flows through REST API integration and smoother end-to-end user journeys, eliminating 95% of data synchronization errors.
- Improved delivery speed by 20% through code reviews, merge requests, Git workflows, cross-functional collaboration (product management, UI/UX, backend, QA/QA teams) and AI-assisted development with Cursor Agent.

Over 1.5 years on Spectrus Conduit, developed 15+ new interfaces and executed a full UI refresh, ensuring 100% design system compliance and UI consistency.

ExonIT LLC

Minsk, Belarus

Provider of GIS / geospatial software and web solutions for government and enterprise customers in Belarus

Full-Stack Developer (ExtJS + PHP)

September 2017 – November 2021

Built and maintained a high-load internal enterprise system for Belarusian Railways with 5,000+ daily active users using Ext JS and PHP (Zend Framework 2).

- Enhanced operational workflow efficiency by architecting 30+ dynamic UI components and complex interfaces using JavaScript and Ext JS, effectively reducing user task completion time by 25%.
- Improved system performance and availability by rewriting PostgreSQL queries and building scalable PHP services, reducing database response times by 40%.
- Drove consistent delivery lifecycles by enforcing clean Git workflows, structuring commit policies and collaborating closely with cross-functional teams to deliver 87% of major releases strictly on schedule.

ODO Farmin

Minsk, Belarus

Pharmaceutical wholesale & retail distributor in Belarus

Full-Stack Developer (Vanilla JS + PHP)

June 2016 – August 2017

- Successfully closed 100+ Jira tickets related to software defects and functional enhancements in a high-load PHP/JS environment.
- Spearheaded the development of 3 major functional modules, ensuring clean, well-documented code and seamless git version control.
- Optimized client-side performance by refactoring JavaScript and modernizing styles, which resulted in a 25% faster page load speed.
- Implemented robust API integrations that streamlined data exchange with external services, cutting manual data processing time by 5 hours per week.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)
Bachelor's degree in Telecommunications, Telecommunication Networks (InfoSec)

Minsk, Belarus
September 2003 – June 2008

- Additional Training: "React and Angular Web Application Development" Course
Educational Centre of Hi-Tech Park Belarus

Minsk, Belarus
May 2021 - August 2021

KEY PROJECTS

SpectrusProcessor (Desktop-to-Web Migration Greenfield Project) | [Project Page] Dec 2021 – Apr 2026
Web platform for analytical/NMR data processing in HealthTech & R&D automation (ACD/Labs)

- UI Architecture: Engineered responsive, high-performance web interfaces for complex 1D/2D NMR workflows and scientific reports using Angular 12–21, TypeScript, and RxJS.Data
- Visualization: Co-developed an interactive, custom Canvas Web Component featuring advanced real-time zoom, pan and responsive data selection tools for spectrum rendering.
- Feature Delivery: Spearheaded development of the frontend architecture for a flexible, drag-and-drop Report Builder module.
- State Management Challenge: Refactored the core Overlay module to synchronize scattered frontend store states, successfully combining Angular Signals and NgRx to eliminate data synchronization errors.

SpectrusConduit (Low-Code/No-Code Platform) | [Project Page] Jul 2024 – Apr 2026
Enterprise software designed to automate R&D workflows and digitize laboratory data (ACD/Labs)

- Feature Delivery: Engineered and delivered responsive card-based UIs and dynamic, data-heavy grids leveraging AG Grid and Angular CDK.
- UI Modernization: Spearheaded a comprehensive frontend modernization initiative, executing a full UI refresh to ensure 100% compliance with a new, unified design system.
- API & Component Design: Wired high-performance layout components to complex backend server REST APIs, focusing on visual consistency, theme-specific styling and strict custom typography standards.

ADDITIONAL INFORMATION

- Languages: Russian (native), English (B2).
- Soft Skills: responsibility, attention to detail, self-reliance, teamwork skills, strong personal qualities and effective communication abilities.
