Minsk, Belarus | Open to relocation within the EU/EEA

Hybrid | On-site | Remote | Freelance (B2B)

SUMMARY

Frontend Engineer (telecom/security background) with 10+ years in web development and 4.5+ years delivering Angular solutions for lab and industrial products actively looking for a new challenging role (available immediately). TypeScript, Angular, RxJS, NgRx, API integration, unit testing, code reviews, merge requests, debugging, technical collaboration, Git, AI assisted workflows. Commercial full stack experience in PHP and Ext JS (Vanilla JS), complemented by practical knowledge of React and Node.js. Domains: telecommunications, security, laboratory and industrial software.

SKILLS

Angular v.12 - 21 | RxJS | NgRx | Signals | TypeScript | Git | REST API | Vitest

Angular Material • AG Grid • CDK • Canvas API • Tailwind CSS • LESS • Jest • Jasmine • npm • pnpm • Jira • VS Code • Cursor • PHP • Zend Framework 2 • MySQL • PostgreSQL • JavaScript • ExtJS • HTML • CSS • React • Node.js • GitHub

PROFESSIONAL EXPERIENCE

ACD/Labs (Revvity Signals)

Minsk, Belarus

Scientific R&D software (analytical chemistry / lab informatics) for pharma and industrial customers

Frontend Developer (Angular)

December 2021 – April 2026

Contributed to the frontend migration of the SpectrusProcessor desktop application to a web platform over a 4.5-year period from the ground up, modernizing the architecture with Angular (v.12–21), RxJS and NgRx (Store, Effects).

- Boosted operational efficiency and streamlined hotfixes/feature delivery via instant server-side updates, leveraging Angular Signals, Signal Stores and Signal Forms for optimal rendering performance, which reduced component re-render times by 35%.
- Enhanced user experience (UX) by architecting a custom Canvas Web Component for interactive scientific graphics, incorporating advanced zoom, pan and responsive selection tools.
- Cut the product's operational and development budget by nearly 40% through migration to a unified web platform, eliminating desktop installation overhead and reducing deployment personnel costs.
- Reduced production issues by 30% and improved performance via bug fixes, legacy refactoring, unit testing and UI optimizations.
- Stabilized data flows through REST API integration and smoother end-to-end user journeys, eliminating 95% of data synchronization errors.
- Strengthened delivery via reviews/merge requests/Git/meetings/cross-functional collaboration + AI-assisted development via Cursor Agent to achieve 20% faster task completion time while delivering higher-quality output.

Over 1.5 years on Spectrus Conduit, developed 15+ new interfaces and executed a full UI refresh, ensuring 100% design system compliance and UI consistency

ExonIT LLC

Minsk, Belarus

Provider of GIS / geospatial software and web solutions for government and enterprise customers in Belarus

Full-Stack Developer (ExtJS + PHP)

September 2017 – November 2021

- Developed a high-load internal enterprise system for Belarusian Railways used by 5,000+ daily active users, managing full-stack implementation with Ext JS and PHP (Zend Framework 2) to streamline complex corporate workflows.
- Enhanced operational workflow efficiency by architecting 30+ dynamic UI components and complex interfaces using JavaScript and Ext JS, effectively reducing user task completion time by 25%.
- Boosted system performance and availability by rewriting complex PostgreSQL queries and architecting highly scalable, fault-tolerant PHP services, which reduced database response times by 40%.
- Drove consistent delivery lifecycles by enforcing clean Git workflows, structuring commit policies and collaborating closely with cross-functional teams to deliver 87% of major releases strictly on schedule.

ODO Farmin

Minsk, Belarus

Pharmaceutical wholesale & retail distributor in Belarus

Full-Stack Developer (Vanilla JS + PHP)

June 2016 – August 2017

- Successfully closed 100+ Jira tickets related to software defects and functional enhancements in a high-load PHP/JS environment.
- Spearheaded the development of 3 major functional modules, ensuring clean, well-documented code and seamless git version control.
- Optimized client-side performance by refactoring JavaScript and modernizing styles, which resulted in a 25% faster page load speed.
- Implemented robust API integrations that streamlined data exchange with external services, cutting manual data processing time by 5 hours per week.

EDUCATION

Belarusian State University of Informatics and Radioelectronics (BSUIR)

Minsk, Belarus

Bachelor's degree in Telecommunications, Telecommunication Networks (InfoSec)

September 2003 – June 2008

ADDITIONAL INFORMATION

- Languages: Russian (native), English (B2).
- Key strengths: responsibility, attention to detail, self-reliance, teamwork skills, strong personal qualities and effective communication abilities.
- Hobbies: travel, photography, flower gardening, cycling, skiing.
